

CELLAR VIDBERTUS

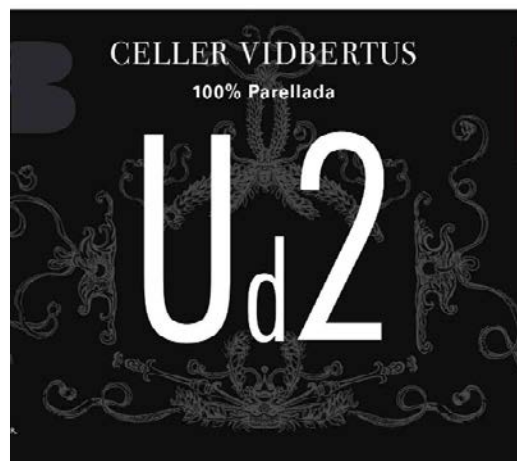

In 2009, David Rovira asked his son Albert if he wanted to do something more useful with their family vineyards instead of bringing the grapes to the local cooperative, and so began their adventure into winemaking at Cellar Vidbertus. The name "Vidbertus" comes from the blending of father and son names David and Albert. While most of the extended family members are involved, the two at the forefront are Albert and his father.

For the first vintage, Fernando Zamora a family friend, who is also the winemaker at Clos de L'Obac, mentored them and helped to make the wine. They were hoping to produce 1,000 bottles that year but were only able to get 996 and so their top level wine is called 996. They make their wine in the "Viver de Cellaristes de la Conca de Barberà, which is a shared facility (to help with costs) but the fruit is all Estate. After the first vintage, Sr. Zamora returned to Priorat and Martí Magrinyà joined the team as winemaker. He has now made the wine with Albert for 7 years.

Climate-wise, Conca de Barberà has a diurnal temperature change of 100+°F, during the day to 53°F in the night. There is little rainfall, in the region, and so cover crops are not needed. In fact in such dry conditions the crops would threaten the vitality of the vines by competing for the water supply. Practices here are organic but not certified.

T.Edward is currently working with three of the Vidbertus wines. Ud2, 100% Parallada named after the parallel plots in the vineyard of David and his brother who make 1 one of the 2 plots (Un de 2). T de Trepat, which is a 100% Trepat Rosat. And the Cup3 which is a red blend of Predominantly Trepat and with Garnacha blended in.

"Ud3"

Varietal/Blend: 100% Parellada

Farming Practices: practicing organic / no artificial chemicals / cannot grow cover crops because there is not enough water to support one

Soil: slate stone & Llicorella / low in Nitrogen, high in mineral

Altitude / Exposure: 460m / N

Vine Training: vaso / goblet

Harvest Technique: hand harvested in early mornings into 15 kg lugs

Vine Age: 1947

Yeast: all natural

Fermentation: carefully destemmed / pressed immediately to stainless steel tanks to avoid oxidation / spontaneous fermentation

Alcohol: 12.5%

RS: 2 mg/l

Production #s: 125 cs (12/750)

Bright and clear, pale, the Ud2 shows a nice yellow color with straw tinges. The nose is very elegant and delicate, not intense at all, but complex and intriguing. Parallada, when mature, shows hints of apple and apricot and white flower. On the palate, there is finesse with a freshness which finishes with a tasty minerality.

Country: Spain

Region: Taragona

Sub Region: D.O. Conca de Barberà

Vineyard: Pla de Cervera (single vineyard)
