

Alfredo Arribas / Vins Nus

Alfredo Arribas has already had one successful career as an architect with experimental buildings dotting the globe. But at the end of the 1990's, his work led him to establish deeper roots in the city of his birth, Barcelona. The Priorat region is 80 miles to the southwest of Barcelona and Arribas was naturally drawn to it as a wine lover. He purchased an estate, Clos del Portal, and began producing cult-worthy estate wines under the name Portal Del Priorat.

The vineyards Arribas found in Montsant inspired him to extend his vineyard holdings and produce two additional family of wines under the banner of VinsNus (Eng. "naked wines"). The inStables series of wines are, according to Arribas, free wines: individual releases ordered in a series by number and each receives its own subtitle. The wine itself is an opportunity for Arribas to free himself to experiment only within the confines of vintage and the origin of the fruit that include Morera, Torroja, and higher vineyards in Lloar. He sees each inStable release as an exercise in assemblage, selecting from an array of unique methods and vessels available in his cellar. The unifying principle is navigating the wine trail itself by selecting wines that, when combined, evoke subtlety and weightlessness through craftwork.

In the Laab cellar, fermentations are spontaneous and preserve whole clusters employing either carbonic macerations or short traditional macerations so as not to over-extract tannins. Three milligrams of sulfur are added before bottling to stabilize the wines and ensure quality after transport. Almost no oak is used in fermentation or élevage, instead a small amount of the wine stays in small stainless while the majority of wine is fermented and aged in cement eggs or clay amphorae of varied sizes and shapes.

INSTABILE NO. 7

"ROSA ROSAE"

Varietal/Blend: red and white Grenache

Farming Practices: organic

Altitude / Exposure: 480-520m / varied

Soil: clay

Year Vines Were Planted: 30 years

Vine Training: goblet

Harvest Technique: by hand in small picks over first half of September

Yeast: ambient

Fermentation: saignée method of a portion of grapes / remainder of fruit macerates whole cluster / co-fermented in stainless steel tank

Maturation: over 12 months in old puncheons and demi-johns

Sulfur: free SO₂ 18 mg/L

Alcohol: 13%

Acidity: 3.00 pH

Fined: no

Filtered: no

Country: Spain

Region: Priorat

"Rosé / claret, since it brings together red and white grenache, harvested and fermented as one. Part of the grapes go through the bleeding process separately, and the rest, without destemming, are infusion for several days through whole grain maceration. The ageing is long, and combines demi-johns and old foudres. Complex, clay-like and saline; a guard wine."
